# KS223 Workbook For...

**Maths**

**First name:**.....

**Surname:**.....

**Primary School:**.....

**Year 6 Class Teacher:**.....

**Thornleigh Form Group:**.....

# Maths

During SMART Steps, I developed knowledge and understanding of key skills. Now I can...

Describe a sequence in words, using numbers and by drawing patterns.

Successfully add and subtract, multiply and divide both positive and negative numbers.

Calculate accurately and confidently with money and budgets.

Represent data correctly with different types of charts and graphs.

Calculate factors, square and prime numbers up to 20.

So that I can continue to make excellent progress in Year 7, I will focus on prioritising the following three SMART qualities - please tick three below:

Self Belief	Attempt stretch and challenge work that is out of my comfort zone.	
Motivation	Completing independent study out of class at home or at a club.	
Awareness	Understand my area for development and ask for help when I need it.	
Resilience	Never give up - no matter how challenging the learning.	
Team Work	In response to teacher feedback, Make A Difference to any work by re-drafting it carefully.	

When I compare my SMART Steps work book with my Year 7 exercise book, I think...	An area for development	Secure	Mastered
The presentation of my work is...			
The level of challenge that I am accessing is...			
The development in my reading skills is...			
The development in my writing skills is...
